# INTRODUCTION

## ABOUT US

Since 1993 WS Workwear has been supplying clothing to some of the largest industrial organisations in Australia.

With workers' safety as our priority all WS Workwear clothing and fabrics are developed to help keep you safe and comfortable all day.

For almost 25 years our design and development team have been working with customers to develop the highest quality shirts, jackets, pants, coveralls, rain gear, safety vests and fire retardant clothing for both men and women that are both comfortable and durable.

We work closely with our customers to offer the best solutions to their uniform requirements. Our comprehensive product and service offering has grown through the supply to various markets including mining, resources, construction, engineering, manufacturing and transport.

WS Workwear is continuously improving its' service offering, quality, fit, styling and consistency. Quality inclusions such as UPF ratings of 50+, and new product developments for improved breathability and venting, as well as double stitched seams helps to ensure wearer comfort and safety at work.

All WS Workwear is manufactured to comply with stringent Australian Safety Standards.

## OUR MISSION

### NO CORNERS CUT.

No job is 100% safe.

Whatever the industry, there will always be risk in achieving reward. That's why we at WS Workwear believe that every worker deserves gear that respects their efforts, by respecting their safety. No corners cut. No style over substance.

### QUALITY, ALWAYS.

All WS Workwear is manufactured and quality tested to meet, comply with, or exceed, stringent Australian Safety Standards.

**WS Workwear**

## Made Safer™

### SAFETY FOR ALL.

With customers and their safety as our priority WS Workwear proudly aims to play a part in ensuring that EVERY Australian worker gets home safely from a hard day's work, EVERY day.

Our internal labels remind the wearer to check their garment for compliance at periodic intervals throughout the year.

The simple checklist below ensures you are "Made Safer" all year long.

#### CHECKLIST

##### FOR HI VISIBILITY GARMENTS

##### HAS YOUR HI VIS SAFETY GARMENT STARTED TO SHOW: -

- Excessive fading?
- Mechanically damaged garment components?
  - Eg: are seams broken or worn?
  - has reflective tape faded or detached?
- Signs of dirt or marks that cannot be removed?

#### IMPORTANT NOTE

IF YOU HAVE ANSWERED YES TO ANY OF THE ABOVE, YOUR GARMENT MAY NOT CONFORM TO SPECIFIED AUSTRALIAN STANDARDS AND SHOULD BE REPLACED.

WE RECOMMEND REVIEWING GARMENT CARE INSTRUCTIONS TO PROLONG THE LIFE OF YOUR GARMENT.

# STANDARDS GUIDE

## WS WORKWEAR GARMENTS MEET THE FOLLOWING STANDARDS

### AS/NZS 1906.4:2010 High Visibility Materials For Safety Garments

To ensure your safety and protection at work all garments in the WS Workwear range are developed to meet the relevant industry and product category standards.

High visibility safety apparel is needed if you work where there is low light and poor visibility, especially if you are working around moving vehicles (cars, trucks or other machinery traveling under their own power - e.g., forklifts etc. Wearing high visibility clothing allows you to be seen by the drivers of those vehicles sooner and more readily.

The human eye responds best to large, contrasting, bright or moving objects. Worker visibility is enhanced by high colour contrast between clothing and the work environment against which it is seen. Extra protection is required at dawn, dusk and night time where the addition of retro reflective tape that reflects light is required to increase visibility.

**CLASS F** = Daytime fluorescent

**CLASS R** = Retro reflective material

**CLASS RF** = Retro reflective and fluorescent

**CLASS NF** = High daytime visibility, non fluorescent

## RETRO REFLECTIVE MATERIALS

WS Workwear garments are manufactured using 3M™ Scotchlite™ reflective materials. 3M™ reflective tapes comply with AS/NZS 14906.4:2010 (Class R) and exceed the brightness requirements for reflective materials.

### AS/NZ 4602.1: 2011 High Visibility Safety Garments.

This standard specifies the design, placement and coverage of high visibility colour (Class D) as well as the design and placement of retro-reflective tape (Class N).

Class N garments allow for visibility in low light or night conditions. When combined with a Class D compliant garment it becomes suitable for all conditions, day or night (Class D/N). When exposed to hazards such as moving traffic, plant or equipment this standard should be followed.

**CLASS D** = Daytime use

**CLASS N** = Night time use

**Class D/N** = Day/ Night use

WS Workwear offers a variety of compliant reflective tapes, including reputable brands such as 3M Scotchlite™ Reflective Material and Loxy®.

3M Scotchlite™  
Reflective Material

## SUN PROTECTION UPF

### AS/NZS 4399:2017

To guard any worker against sunburn and exposure to harmful UV rays the WS Workwear clothing range offers protection in fabric and design under the new amendment to the standard.

WS Workwear recommends the wearer should wear garments that comply with UPF 50+ with full arm and leg coverage: To ensure complete protection, a hat and sunscreen should also be worn.

UPF (Ultraviolet Protection Factor) represents the ratio of sunburn-causing UV without and with the protection of the fabric, similar to SPF (Sun Protection Factor) ratings.

A rating of 50+ is the highest rating available and is classified as excellent protection.

This standard specifies the requirements for determining the UPF level of protection from the sun for garments that are worn in close proximity to the skin. There are three protection categories:-

◆ **Minimum Protection** (UPF 15)

◆ **Good Protection** (UPF 30)

◆ **Excellent Protection** (UPF 50, 50+)

## FABRIC SAFETY

### ISO 14184-2:2011

Formaldehyde is a volatile organic compound and is present in nature in small quantities. It can cause irritation when worn against the skin which is why all WS Workwear fabrics are tested to ensure they comply with International and Australian standards for the allowable levels of formaldehyde.

We independently test each batch of fabric to ensure naturally created formaldehyde levels are kept well within the recommended standards, ensuring you are "Made Safer".

## WATERPROOF

### AS 2001.2:18-1987

To keep you dryer whilst working in wet environments either indoors or outdoors WS Workwear wet weather garments use waterproof fabric and have all seams sealed to keep you protected from the elements.

## FIRE RETARDANT (FR)

Fire Retardant (FR) clothing helps protect workers from short-term thermal incidents. In an industrial setting, the most serious burns typically aren't caused by the actual fire or explosion itself, but by standard work gear (made from non-FR cotton, nylon or polyester) igniting and continuing to burn even after the heat source has been removed.

FR clothing helps combat this problem because it self-extinguishes when exposed to flame, dramatically reducing the severity of burn injuries. Minimising the percentage of the body that is injured by burns can greatly increase chances of survival.

## STATIC CONTROL

### AS/NZS 1020:1995

Material such as paper, plastic and textiles normally contain an equal number of positive and negative charges - that is, they are electrically balanced. Friction can disturb this balance, causing the material to become electrically charged.

WS Workwear is made from natural fibres like cotton and cotton - blends that manage static build up.

The AS/NZS 1020:1995 standard defines recommendations for the control of static electricity. 100% cotton and 50%/ 50% cotton blend products are defined as suitable fabrics to manage the risk of static build up. PPE (Personal Protective Equipment) is equipment or clothing that will protect the user against health or safety risks at work.

## PPE CATEGORY RATINGS

### NFPA 70E

These guideline ratings have been provided to ensure you are protected from Arc Flash. An Arc Flash is an explosive release of energy caused by a current passing between two points.

Garments are rated based on their ability to protect against electrical arcs. This arc rating is expressed in cal/cm².

The protective clothing worn by employees must be based upon the incident energy associated with the task being performed.

PPE is specified in the NFPA 70E Safety Standard and defines the level of protection required for a particular job or task.

HAZARD / RISK CATEGORY	CLOTHING DESCRIPTION (TYPICAL NUMBER OF CLOTHING LAYERS IS GIVEN)	REQUIRED MINIMUM ARC RATING OF PPE CAL/CM²
1 CAT	Arc-rated shirt and FR pants or FR coverall [1 layer]	4
2 CAT	Arc-rated shirt and FR pants or FR coverall [1 or 2 layers]	8
3 CAT	Arc-rated FR shirt and FR pants or FR coverall and arc flash suit selected so that the system arc rating meets the required minimum [2 or 3 layers]	25
4 CAT	Arc-rated FR shirt and FR pants or FR coverall and arc flash suit selected so that the system arc rating meets the required minimum [3 or more layers]	40

As the PPE categories increase, so too do the Arc-Rating clothing requirements.

Arc Thermal Performance Value (ATPV) defines the protection level against second and third degree burns and measures heat transfer through fabric.

# FABRIC GUIDE

## COTTON

### 145GSM COTTON RIPSTOP

A fine fabric weave with coarse fibres ribbed at intervals (grid appearance) that makes them resistant to tearing and ripping

### 160GSM COTTON DRILL

Lighter cotton fabric with drill weave that provides durability and comfort to clothing.

### 310GSM COTTON DRILL

Traditionally used in Workwear due to its strong bias (diagonal) weave. It offers durability and tear strength.

## POLYESTERS

### MICROMESH

Shiny, lightweight synthetic fabric with small eyelets which provides excellent breathability.

### 270GSM COTTON CANVAS

This tight and robust weave offers durability against harsh applications.

### POLYESTER FLEECE

Soft brushed fabric that insulates body heat. Front face is soft and inner face is brushed for comfort.

### OXFORD

A strong tight weave that helps reduce water penetration.

### POLAR FLEECE

Soft insulating brushed fabric (2 faces) to provide extra warmth.

**CORDURA**

Some WS Workwear garments have Cordura® incorporated into the fabric to enhance tear and abrasion resistance.

## QUALITY & FABRIC TESTING

WS Workwear garments and fabrics undergo rigorous testing to ensure they are fit for purpose.

Our international production facilities have received accreditation under ISO 9001-2015.

WS Workwear fabrics undergo detailed testing processes before being approved to ensure that fabrics are the correct colour and meet required Australian Standards. Pre-production sample fabrics from new batches are rigorously tested to ensure continuity of our standards approval and quality.

Product materials and components are of the highest quality, and our manufacturing and testing partners use state-of-the-art technology and equipment.

### ADDITIONAL QUALITY CONTROLS ARE AS FOLLOWS:

- ◆ Samples of fabrics are retained for our records and comparison.
- ◆ All garments contain labels identifying the fabric lot used.
- ◆ Testing is undertaken in the fabric mills prior to dispatch.
- ◆ Quality controls are maintained in our ISO approved factories by our accredited Quality Control team.
- ◆ Pre-shipment samples for final inspection and confirmation are sent to our Product Development team for checking and approval prior to shipment.
- ◆ Master samples of fabric and garments are also retained in our Quality Control department to enable future orders to be cross-checked for quality and consistency.

A variety of tests are carried out on all fabrics to meet specific performance and safety criteria to comply with Australian Standards.

AS/NZS 4602.1:2011 specifies the visual requirement for high visibility safety garments for occupational wear by people who may be exposed to hazard from moving traffic, moving plant or equipment in high risk situations and are directly related to consumer end use of textile products.

## ETHICAL SOURCING

WS Workwear is committed to the social, environmental and financial sustainability of our manufacturing partners.

In addition to ISO International Audit Standards, meeting our own WS Workwear requirements is essential for attaining and upholding the benchmark to do business.

All suppliers and their factories must adhere to the Bunzl Ethical Sourcing Policy. Our approach to ethical sourcing is one of complete transparency and continuous improvement. We expect our supply partners to hold these same values and we have a fully dedicated team that continually monitor our international manufacturing process.

WS Workwear has a portfolio of innovation and expertise in sourcing and providing quality products.

We also provide peace of mind to customers through:

### SOCIAL ACCOUNTABILITY

As the cornerstone of our corporate responsibility philosophy, it is important to ensure that we have ethical and social compliance policies in relation to all aspects of our sourcing and procurement of our products.

- ◆ Established manufacturing facilities
- ◆ Stringent QA/QC controls
- ◆ Supply chain efficiency

## FABRIC TESTS

### REQUIRED TO MEET OUR STANDARDS

#### DIMENSIONAL CHANGE TO WASHING COLOUR FASTNESS TO:

- ◆ WASHING FOR DURABILITY
- ◆ PERSPIRATION (ALKALINE & ACID) RESISTANCE
- ◆ RUBBING
- ◆ LIGHT FASTNESS
- TENSILE STRENGTH (BREAK FORCE)
- TEAR STRENGTH
- FORMALDEHYDE (FREE)
- ULTRAVIOLET PROTECTION FACTOR (UPF)
- HIGH VISIBILITY - LUMINANCE & CHROMATICITY

CLASS D  
DAY USE ONLY

## DAY CLASS

Day (D) garments are made from high visibility fabrics and are designed to keep you safe by allowing you to be more visible during daylight. Garments are tested and comply with AS/NZS 1906.4:2010 & 4602.1:2011.

Note: Retro-reflective tape does not contribute to visibility during normal daylight conditions.

NIGHT USE ONLY

## NIGHT CLASS

Night (N) garments are made from non high visibility fabrics and use retro-reflective tape as a means of keeping you visible - reflecting light back towards the source allowing you to be seen more easily at night-time and in low light conditions.

Garments are tested and comply with AS/NZS 1906.4:2010 & 4602.1:2011.

SHOWER PROOF

## SHOWERPROOF

A showerproof garment will keep you dry and comfortable in a light rain shower. These garments will not provide the same level of protection as a waterproof garment.

VENTED

## VENTED GARMENT

Our workwear garments have several venting systems available to meet a variety of requirements. Our Kooflow range has a vertical venting system and is designed to take advantage of the natural flow of air. Other styles have underarm and/or horizontal vents to keep you cool.

EASY CARE

## EASY CARE

When laundered correctly, our garments containing specialty fibres, fabric weaves, constructions and treatments are easy to maintain. Garments are hardwearing, practical and require no special treatment during washing.

CLASS D/N  
DAY OR NIGHT USE

## DAY & NIGHT CLASS

Day/Night (D/N) is a combination of both Day (D) and Night (N) standards as listed. These garments are manufactured using a specified design of both high visibility fabric and retro-reflective tape. Combining the benefits of both fabric and tape configurations allows you to be seen more easily, both day and night. Garments are tested and comply with AS/NZS 1906.4:2010 & 4602.1:2011.

STATIC CONTROL

## STATIC CONTROL

Standard AS/NZS 1020 :1995 is The Control of Undesirable Static Electricity. Cotton fibres naturally do not hold or generate static electricity which makes it the perfect choice for use in industrial workwear.

WET WEATHER

## WATERPROOF

These garments have been manufactured using fabrics with a waterproof finish, coating or dual membranes to avoid water penetration. Dual protection seams have been heat sealed to keep you dry and comfortable.

Garments are tested and comply with AS 2001.2 .17 -1987. (Hydrostatic Pressure Test)

COOL LIGHT  
WEIGHT

## SUMMER WEIGHT GARMENT

Our 145gsm and 160gsm fabrics are light, durable and designed for wear in the hottest, harshest conditions whilst still keeping you comfortable.

EASY FIT

## EASY FIT / FLEX

Garments with the Easy Fit icon have a hidden flexi-fit adjustable waist for instant added comfort and flexibility.

RAIL COMPLIANT

## RAIL COMPLIANT

Particular areas of rail work require an X back pattern reflective tape configuration.

Garments in this category have been specifically designed to meet these requirements.

FIRE RETARDANT

## FIRE RETARDANT

To be considered fire retardant or flame resistant, a fabric must self extinguish when ignition is removed. There are 2 types of fabric classifications.

### ◆ CHEMICALLY TREATED FLAME / FIRE RETARDANT

Fabrics that are chemically treated with a fire retardant chemical to slow down burning or self-extinguishing when exposed to flame.

### ◆ INHERENT FIRE

Inherent fabrics are made from non-flammable/flame resistant materials that are woven or knitted into their fabric structures.

SUN PROTECTION

## UPF RATING 50+, 30, 15

Ultra Violet Protection Factor (UPF) measures ultraviolet radiation from the sun.

- ◆ **UPF 15** - Minimum protection
- ◆ **UPF 30** - Good protection
- ◆ **UPF 50, 50+** - Excellent protection

A rating of 50+ is the highest rating and is defined as excellent protection from the sun.

SUN PROTECTION

SUN PROTECTION

SUN PROTECTION

PPE 1

## PERSONAL PROTECTIVE CATEGORY (PPE)

Personal Protective Equipment Category (PPE) are categories that are specified in the NFPA 70E Electrical Arc Flash guidelines.

- ◆ **PPE 1** Clothing required to meet a minimum Arc rating of 4 Cal /cm<sup>2</sup>
- ◆ **PPE 2** Clothing required to meet a minimum Arc rating of 8 Cal /cm<sup>2</sup>
- ◆ **PPE 3** Clothing required to meet a minimum Arc rating of 25 Cal /cm<sup>2</sup>
- ◆ **PPE 4** Clothing required to meet a minimum Arc rating of 40 Cal /cm<sup>2</sup>

PPE 2

PPE 3

PPE 4

ATPV

## ARC RATING

Arc Thermal Performance Value (ATPV) defines the protection level against second and third degree burns (Arc Flash). The higher the number, the greater protection provided.

# SHIRTS

## You work hard and so should your work shirts!

At WS Workwear we respect the need for work shirts to be safe, comfortable enough to move freely and tough enough to withstand the harsh Australian elements and even harsher washing.

We have a comprehensive range of hi vis shirts complying with Day or Day/Night standards, with a choice of fabrics, weights, designs and taping configurations. Chambray and natural coloured work shirts in the latest cuts complete our offering.

## Quality Counts

Our seams are double stitched and hems are double-folded and securely finished. Bar tacking is used at stress points along with adjustable twin button closure on all shirts including those with a gusseted sleeve.

## WHATEVER YOU'RE DOING WE'VE GOT A SHIRT TO FIT

You can also be confident that all WS Workwear garments will retain their colour and shape, wash after wash.

## ULTRA LIGHT WEIGHT RIPSTOP SHIRTS

are made from lightweight 145gsm premium cotton with a horizontal back yoke venting system to keep you cooler. As their name suggests Ripstop Shirts are weaved specially to stop the shirt from ripping further should a tear occur. Other standard features include a three piece collar with extended height for protection from the sun, twin back pleats for ease of movement and adjustable twin button cuff closure.

### FEATURES

#### Cool Ultra Light Weight Fabric

These garments include horizontal back yoke venting and additional underarm mesh vents for added comfort and breathability.

Australian Accredited 3M™ Reflective Tape has been applied to this garment to provide you with additional visibility protection. A Ripstop fabric weave stops further ripping should a tear occur.

- ◆ 3M Reflective Tape - 50mm
- ◆ Horizontal back yoke venting
- ◆ Underarm mesh vents
- ◆ 3 piece collar with extended height for added protection

A man wearing a white hard hat, an orange high-visibility work shirt with reflective silver stripes, and dark blue cargo pants stands in an industrial setting. He is holding a pair of black gloves and sunglasses. The background shows a long, blue industrial building with a concrete walkway.

# TROUSERS

**As the modern  
workwear standard  
for men, our cargo  
pants are versatile  
and practical**

with a variety of handy pockets for accessories such as phones, keys, rulers and knee pads (in some styles).

Most of all, our cargo's have been designed for extreme comfort and durability, with double seams and reinforced pockets.

A man in a high-visibility orange and blue work shirt, dark blue shorts, safety glasses, and black gloves is working on a blue truck. He is using a tool to adjust a component on the side of the truck. The truck has a blue upper section and a black lower section with large tires. The background is a dark, textured surface.

# SHORTS

**Made with  
versatility and  
toughness**

The WS Workwear range of pre-shrunk cotton shorts are designed for everyday wear and comfort.

From the ever popular 'Tradiesmate' canvas shorts which are reinforced with Cordura® for toughness, to our Classic range of taped and untaped drill varieties, our range will stand up to some of the toughest environments.

A photograph of two welders in a workshop. One welder is wearing a bright yellow high-visibility coverall with reflective silver stripes, and the other is wearing an orange high-visibility coverall with reflective silver stripes. Both are wearing protective welding masks and gloves. They are working on a large, vertical metal pipe, with bright sparks emanating from the point of contact. The background shows industrial equipment and a concrete floor. A large green diagonal banner is overlaid on the top right of the image, containing the word 'COVERALLS' in white, bold, sans-serif capital letters.

# COVERALLS

## **Workwear coveralls offer added protection**

from harsh elements or substances that are part of some jobs. Our range of cotton coveralls, available in different weight and style options will keep you protected longer.

# FIRE RETARDANT GARMENTS

**WS Workwear  
Fire Retardant (FR)  
Clothing keeps you  
protected from the  
risk of exposure to  
Fire or Arc Flash**

FR clothing is self-extinguishing when exposed to flame, dramatically reducing the severity of burn injuries.

- ◆ Concealed button closure

**OUR FIRE RETARDANT (FR) OFFER**

Cotton, on its' own is a highly flammable fibre, but is the most widely used material in the world. It's inherent softness is enhanced by its ability to keep the wearer cool in warm climates and warm in cold climates. Hence making it the best fibre for workwear.

In our Fire Retardant range we continue to provide this great fibre, with added treatments, or in conjunction with other fibres that help delay flame or arc flash situations. Our Fire Retardant fabrics are listed below:-

**PYROVATEX® DURABLE FLAME RETARDANT FINISH**  
100% Cotton Drill with Pyrovatex® Fire Retardant treatment providing maximum protection against heat and flame hazards with the added comfort, feel and breathability of cotton.

This chemical treatment PYROVATEX® forms a link and penetrates the cotton fibre, compared to other treatments that simply coat the top layer of the fibre.

**PARVOTEX® INHERENT FIRE RETARDANT FABRIC**  
Is an Inherent Fire Retardant fabric with a combination of Modacrylic/Cotton/Polyamide/Polyarylate/Anti-static in-built fibres for protection against electric arc and flash fire hazards.

PARVOTEX® fabric is durable, soft, retains its appearance and its Fire Retardant components do not wash out.

TO FIT HIPS (cm)	87	93	98	103	108	113	118	123	128	133	

- ◆ FOR A COMFORTABLE FIT - IT IS IMPORTANT TO MEASURE CORRECTLY
- ◆ WHEN MEASURING - MAKE SURE THE TAPE MEASURE IS LEVEL AND NOT TIGHT

This guide follows Australian **BODY SIZING MEASUREMENTS** recommendation.

**THESE ARE NOT GARMENT MEASUREMENTS** (with the exception to fit waist for short/pants)

### SPECIAL NOTES

#### FOR TROUSERS

Use only waist and inside leg measurements to make your selection.

#### FOR SHIRT CHEST

Please note this is "TO FIT" chest measurement - shirts chest measurements are bigger for comfort and movement.

#### FOR JACKETS

Use chest measurement only. Jackets are normally worn over clothing and have been designed to be slightly bigger than a shirt.

## CARE AND MAINTENANCE

### RECOMMENDATIONS TO PROLONG THE LIFE OF YOUR GARMENTS!

#### QUICK TIPS

Always follow instructions on all care labels attached to the garment.

Dry and store safety hi vis garments away from sources of heat and light.

Inspect regularly for garment serviceability, excessive fading, mechanically damaged components or dirt/soiling.

#### SPECIAL NOTES

If any of the above is not followed, it may result in garment non-conformance to specified Australian Standards and therefore should be replaced.

We recommend a critical garment examination every 3-6 months intervals.

#### GARMENTS TRIMS

Just like fabrics, components like reflective tape, polyester patches and other trims require care. Here are some extra tips:

- ◆ Where possible, you should wash the garment inside out. This helps protect trims for any abrasion and avoid any bleeding of colours.
- ◆ Do not use fabric softener on reflective tape garments. Excessive amounts of fabric softener may significantly damage the reflectivity of the tape.

### WASHING INSTRUCTIONS

#### COTTON DRILL

##### WARM MACHINE WASH

DO NOT WASH OVER 60°C  
WASH GARMENT SEPARATELY BEFORE FIRST USE  
WASH GARMENT WITH SIMILAR COLOURS AND GARMENTS FOR CONSECUTIVE WASHES.

##### DO NOT USE BLEACH OR WHITENERS

THIS INCLUDES SOAKERS OR DOMESTIC DETERGENTS CONTAINING WHITENERS

##### LINE DRY IN SHADE

AVOIDING PROLONGED TIME IN SUNLIGHT REDUCES COLOUR FADING

##### MAY BE TUMBLE DRIED ON WARM SETTING

##### HOT IRON ON REVERSED SIDE

DO NOT IRON TAPE IF APPLICABLE

#### FR GARMENTS

Flame resistant garments require special laundering and care to optimise their performance and prolong the protective quality of the fabrics.

##### WARM MACHINE WASH

DO NOT WASH OVER 60°C  
WASH GARMENT SEPARATELY BEFORE FIRST USE  
WASH GARMENT WITH SIMILAR COLOURS OR WITH OTHER FR GARMENTS

##### DO NOT USE BLEACH OR WHITENERS

THIS INCLUDES SOAKERS  
DO NOT USE FABRIC SOFTENERS ON FR GARMENTS  
DO NOT USE ACID RINSE  
(e.g. vinegar, citric acid, acetic acid or any acid mostly used in commercial laundering)

##### DO NOT TUMBLE DRY HOT OR DO NOT OVER DRY

OTHERWISE IT WILL RESULT IN EXCESSIVE SHRINKAGE

##### WARM IRON ON REVERSED SIDE

DO NOT IRON TAPE IF APPLICABLE
