

## BH01118 CROSSOVER FALL ARREST HARNESS

Full Body Crossover Harness Front and Rear Fall Arrest Attachment points

### Material and Construction

- 44mm Black and gold polyester webbing
- Zinc plated forged rear D Ring with stand out feature
- Zinc plated forged 2 bar 3 bar buckles
- Colour fast webbing
- Labelling fully protected by Clear PVC

### Application and Usage

- Fall Arrest - Using shock absorbing lanyard on the rear D Ring, an inertia reel device attached to the rear or front D Ring
- Restraint Technique – Using shock absorbing lanyard on the rear or front D Ring to limit access to fall situations
- Recovery & Rescue - Use front D Ring

### Testing and Quality Control

- AS/NZS 1891.1.2007 Certified Product
- 100% visually inspected and proof loaded
- All raw materials conform to relevant safety standards

BODY HARNESSSES

## Features

- Manufactured from a light weight, comfortable and durable webbing, suitable for the harsh Australian work environment.
- Front and rear fall arrest attachment points, a large “stand off” front and rear D Rings facilitate an easy means of attachment.
- Fully adjustable leg, shoulder and crossover straps, affords a secure fit and optimal comfort.
- Clear and protected instructional labelling, allows for easy understanding of applications for attachment points, and to assist with donning of harness.
- Crossover fit - ideal harness for women.
- Forged Buckles and a forged front and rear D Rings provide the optimum level of safety, providing strength and a better protection over stamped alternatives. Also minimises “creep” of the harness under normal wearing.
- Sub-pelvic strap prevents harness “peeling off” in the event of a fall providing enhanced safety, and assists with distributing the forces from a fall.
- Harnesses are proof loaded and given a dedicated final inspection process prior to release. This attention to detail allows us to provide “peace of mind”.
