

BMIC02-130AT ARRESTO-LITE MINI SELF-RETRACTING LIFELINE WITH TRIPLE ACTION KARABINER 140kg x 2m

The **Arresto-Lite** is the lightest retractable inertia reel in the range and is both robust and easy to carry.

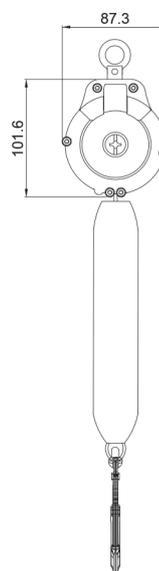

Consisting of durable plastic casing and an aluminium triple action karabiner with fall indicator, the **Arresto-Lite** provides a minimal fall distance, hence making retrieval of the fall victim easier.

Features

- Extremely light weight (less than 600gm) and easy to carry
- Inbuilt textile energy absorber
- Robust & durable plastic casing
- Aluminium triple action karabiner with fall indicator
- 21mm Technora polyester webbing
- 20kN breaking strength
- Edge tested (to 100kg) and approved where falls over an edge are possible
- Tested and approved to 100kg for fall factor 2

SHOCK ABSORBING LANYARDS

Compliance

- Meets EN 360:2002
- Under Clause 1.6 of AS/NZS1891.3 1997 "Fall Arrest Devices complying with EN353-1, EN353-2 or EN360 are acceptable for use in Australia and New Zealand"

Testing Criteria

- Static Strength :15Kn for 3 min
- Dynamic Performance :100kg mass free fall of 600mm with breaking force of less than 6Kn & arrest distance of less than 2 metres
- Edge tested to 100kg and approved for use where fall over edge is possible and fall factor 2

Servicing

The BMIC02-130AT is not servicable. If inspection reveals unsafe operation or the unit has been in a fall, the inertia reel should be removed from service.

Product Life

The inertia reel can remain in service provided it passes full inspection criteria.

Code: BMIC02-130AT

Description: Retractable Fall Arrester with aluminium triple action karabiner

Capacity: 140kg

Length: 2 metres
